

EARTH | Make the Earth your own?

Your planet is not your possession, but on *loan to you* and it's a biosphere allocated to you for a *certain* period of time to facilitate your spiritual development. All of you are guests in the physical house of the LORD. You are however unaware of this hospitality. This is why you demolish terrestrial facilities, harm the health of the other guests and destroy their existence and physical life into the bargain.

... At a time when you enjoy such a highly technical and scientifically advanced existence, you leave very little room for your **own** thought processes, for you **own** self. You are *wedged* into situations that leave you very little room for your **own** contemplations. Your body is subjected to rays and a poisoned environment that have an effect on your nervous system and your whole organism. This is a *creeping process* and it slowly changes your behaviourism.

- You must **recognise** that the connection to your ORIGINAL ENERGY, to your nature and to your Earth has an important function!

You have **trimmed** the very roots of your existence and you do not recognise the fact that you are slowly going to rack and ruin. You annihilate yourself and *this* brings with it aggressive reactions and violence. It is a giving and a taking, Cause and effect. The Earth does not give off the ENERGY it once gave off. **You** have changed the Earth and you are now surprised that you *also* change.

Comment:

One must have taken the biblical words of "go forth and multiply and take control over the world" *too literally*.

EUPHENIUS:

This text is a *back to front rendition* of the original text. You should not **take control** of the Earth but **live in harmony with everything that exists** here; you constantly forget that you represent ELEMENTS of VIBRATIONS, which **emit** VIBRATIONS that affect everything you encounter. You re-emit everything that you *reabsorb*. If you enter a toxic forest you will exit that forest poisoned.

It is also written:

„Be fruitful and multiply and fill the earth and subdue it and have dominion over the fish of the sea and over the birds of the heavens and over every living thing that moves on the earth.“

- It is not written that you should *overpopulate* the Earth.
- It is not written that you should allow yourself *to be triumphed over* by the Earth, by physical matter. You should subdue the Earth -you call it physical matter - as it stands at the moment *you are its subjects* and it *reigns over you* to a high degree.

- It is not written that you should hold *dominion over* your fellow men, only over fish, fowl and all other animals.

The wunderkind of human ingenuity can force NATURE to behave *less aggressive* towards mankind; because some natural disasters are brought about by negative energies *that can be triggered by man*.

- Man should hold dominion over *planet Earth*, but only over planet EARTH! - and *not* its inhabitants; I *mean to say*, not over its people.

There is a possibility that political atheism takes the negative behaviourism of nature *as their primary paradigm*. The first steps in that direction have already been taken. If they continue along these lines, these people will achieve *the same level* negative nature occupies, meaning that they will no longer know the difference between good and evil, no longer feel LOVE or KINDNESS - that they will allow other consciousnesses to do the thinking for them.

- *By comparing himself with generic nature, it can easily happen that he will completely regress back to his original, primitive state. Naturally not from one day to another.*

Question:

Did planet Earth adapt to the development of man or did man orientate himself according to the conditions on Earth?

LUKAS:

Well, mankind tried - and is still trying - *to force its will* on nature, respectively on planet Earth. Every rational mind must realise that this cannot go well. Unfortunately, not a lot of minds understand this. Nature, respectively the Earth *will never adapt* itself to the control of man. This is an impossibility from a LEGAL point of view, because the laws of nature would have to be abolished and only the CREATOR can do this. These measures would result in chaos, a chaos you would not survive. ...

LUKAS:

Nature can be compared to a robot that only acts according to the Creator's natural laws programmed into its system. And nature, this robot, **will react** - respectively is already reacting. Everything may take place according to your free will.

From the protocol [\[Man and the reason of his earthly existence\]](#) - page 16

... It is up *to all of you* to subjugate the Earth to your needs. But this "subjugation" - in inverted comas - actually means that you **must take responsibility** for all the creatures in your trust. Whether you're willing or not!
